

## Acute medication formulary

Effective 1 January 2025

### PLEASE NOTE!

- This formulary applies to the acute medication benefit for **Wooltru Healthcare Fund Network Plan**.
- Reference pricing is applied. Members are advised to discuss the availability of less costly generics with the pharmacist at the point of dispensing.
- The examples below serve as a guide to the prescriber. Listing of a particular product does not guarantee that a reference price will not be applied.
- If a product is dispensed that costs more than the reference price, the member will need to pay the difference in price at the point of dispensing.
- Quantity limits apply to some items on this formulary. Quantities in excess of this limit will need to be paid by the member at the point of dispensing unless an authorisation has been obtained for a greater quantity.
- The formulary is subject to regular review. The formulary may be updated and changed when new information becomes available, prices change or when new medications are released.
- While every effort has been made to ensure that products listed are available on the market, it is possible that some products may be discontinued by the manufacturers during the course of the year. Should this be the case, members are advised to discuss alternatives with the pharmacist or the prescribing doctor.
